Idowu Joshua Victor

Frontend developer/graphic designer

+234 816 1523 407   joshmech851@gmail.com   Lagos,Nigeria

SUMMARY

I'm passionate about blending technology with creativity. As a front-end developer, I specialize in crafting responsive, user-friendly websites, ensuring that they not only function seamlessly but also look stunning. My background in graphic design complements my coding skills, allowing me to create visually appealing and cohesive digital experiences. I love pushing the boundaries of both code and design, constantly exploring new ways to bring ideas to life.

EXPERIENCE

2018 – 2020

In 2018, I embarked on my journey as a self-taught graphic designer, driven by a passion for creativity and a desire to bring ideas to life visually. With no formal training, I immersed myself in learning design principles, mastering software, and experimenting with various styles and techniques. Over those two years, I honed my skills through practice, online courses, and real-world projects, transforming my passion into a solid foundation in graphic design. By 2020, I had built a diverse portfolio that showcased my growth and creativity, marking the beginning of my professional path in design.

2020 – 2022

My career as a graphic designer began in an unconventional but formative way by working at a few local cyber cafes. These were my early days, where I put my self-taught skills to the test, creating everything from business cards to flyers for local clients. The fast-paced environment and diverse range of projects allowed me to sharpen my design abilities and adapt quickly to different needs. It was in these cafes that I truly realized my passion for design, turning it into a stepping stone for my future in the creative industry.

2022 – now

In early 2023, I embarked on a new challenge—learning front-end development on my own. With a foundation in graphic design, I was eager to expand my skill set and bring my creative visions to life through code. Through countless hours of self-study, practice, and real-world projects, I honed my abilities in HTML, CSS, and JavaScript, transforming my passion into a professional skill. Today, I work as a freelancer, combining my talents in both graphic design and front-end development. I also make time to give back by taking on volunteer projects, using my skills to support meaningful causes.

SKILLS & COMPETENCIES

- Proficient in JavaScript
- Expert in HTML/CSS
- Knowledge of Webpack and other UI build tools
- Knowledge of UX/UI design principles
- Strong problem solving and debugging skills
- Excellent communication and collaboration skills
- Knowledge of code versioning tools such as Git
- Expert in corel draw, adobe illustrator and photoshop

LANGUAGES

English   Yoruba

EDUCATION

Currently pursuing BSc in statistics at OLABISI ONABANJO UNIVERSITY, OGUN STATE, NIGERIA.
